Dear Daniel/Paula: The OFA Thyroid Registry Panel is normal. Congratulations! Recommend annual retesting. Jean

TGAA CONFIRMATORY TEST RANGES < 10% =**Negative**; 10%-25% =Equivocal;>25%= Positive

If positive (elevated), the TGAA level confirms autoimmune thyroiditis. False positive results can occur if the dog has been vaccinated for rabies within 30 to 40 days. Thyroid hormone supplementation can decrease TGAA levels.
